PROFESSIONAL SUMMARY

Computer Science undergraduate at the University of Westminster (UK), currently studying at IIT, with strong skills in programming, problem-solving, and software development. Interested in game development and AI systems, with hands-on experience in building web, mobile, and intelligent applications. Seeking an internship to apply technical skills and contribute to real-world software projects.

EDUCATION

BSc (Hons) Computer Science

2024 - Present | Level 5 / Year 3

University of Westminster (UK) - Informatics Institute of Technology (IIT)

GCE Advanced Level

2022

Physical Science Stream

PROJECTS

1. CareerVerse - Career Recommendation & Job Simulation Platform [Website]

HTML | CSS | JavaScript | AI Logic

- Developed a web-based career recommendation system using HTML, CSS, JavaScript, and basic AI logic to suggest career paths based on user input.
- Implemented interactive job simulations and AI-driven career suggestions.
- Collaborated successfully within a team environment using structured software development practices.
- Designed an intuitive UI/UX, resulting in an engaging and accessible career exploration experience.

2. Pharmacy Management System [GitHub]

Java | MySQL | JavaFX | MVC Architecture

- Built a secure application to manage medicines, inventory, and transactions efficiently.
- Implemented core CRUD features, improving overall accuracy and usability for potential users.
- Developed an optimized database schema using MySQL for robust inventory tracking and reporting.
- Ensured strict data integrity while handling core business workflows seamlessly.

3. JARVIS AI Assistant [GitHub]

Python | Machine Learning | Natural Language Processing

- Engineered an offline AI assistant with voice recognition capabilities using Python.
- Integrated intelligent natural language processing pipelines for robust conversational interactions.
- Implemented extensive task automation features, significantly streamlining daily productivity.
- Designed a modular architecture, easily allowing for agile future feature expansion.

4. The Last Dive - Sci-Fi Escape Game

Unreal Engine 5 | Blueprints | UMG | Game Design

- Developed a first-person sci-fi escape game in UE5 set inside a flooded underwater facility.
- Designed interactive gameplay systems including keypad-based puzzles, doors, and elevator systems triggering under tight countdown real-time mechanics.
- Structured level progression and environmental design using advanced Unreal Engine Blueprints.
- Implemented immersive UI mechanics and visual feedback to the player using UMG elements.

SKILLS

Programming Skills	Python, Java, Kotlin
Web Technologies	HTML, CSS, JavaScript
Conceptual Skills	OOP, Data Structures, Algorithms, Database Management
Other Tools	GitHub, VS Code, Figma, ClickUp, Unreal Engine
Soft Skills	Problem Solving, Teamwork, Communication, Time Management

ACHIEVEMENTS & CERTIFICATIONS

- **Professional Certificate in Web Development (2025):** Comprehensive coursework executing Front-end and Back-end architecture, SQL/NoSQL databases, and robust Version Control Systems handling.
- **LinkedIn Certifications:** Completed Advanced Python, Python OOP, and Programming Foundations: Data Structures.
- **Hackathon / Competitive Academic Excellence:** Achieved standout performance in algorithmic and software-based development challenges at IIT.

EXTRA CURRICULAR ACTIVITIES

- Played football at inter-university level.
- Active participant in hockey competitions.
- Member of the E-Sports community at IIT.
